

Linx 490S

Leak Data Collection Software

The VIC **LINX 490S** is a powerful data collection software that gives user a remote control over its VIC MD-490S device. It generates data reports from sniffing tests and provides tools to adjust the instrument's features.

BENEFITS

- Operator Management
- Remote Control of the MD-490S
- Leak Rate Data Collection up to 100 Samples
- Reports Creation
- Charting Leak Rate
