# TLC60
REMOTE CONTROL

.|ATEQ

TLC60 remote control allows the remote piloting and selection of various settings of the ATEQ range of devices. This remote control is to be connected to the Input/Output connector.
On power-up, as long as the "End of cycle" information is not present, the TLC60 remote control alternately displays its program version and the indicator tests.

Note: changing the program number (incrementing or decrementing) can only be done outside a control cycle.
