

# We test, You produce

## B28

### HIGH SPEED COMPACT LEAK TESTER FOR INDUSTRIAL QUALITY CONTROL

Without a doubt, the **B28** is the smallest high-performance leak tester for battery cells and breathable membranes. One of the main advantages is that our **B28** module can quickly test the cell's insulation. To ensure the best measurement conditions, the **B28** has the optional capability to control filling and dumping vacuum around the part to test in a specific enclosure. You can daisy chain up to 50 modules and monitor them with a touch screen panel and our user-friendly interface: **B28** control.

Specifically adapted for automatic and semi-automatic test machines, the **B28** has a full range of specifications at a very competitive price.

#### BENEFITS

- COMPACT
- HIGH SPEED TESTING
- ACCURATE
- 50 MODULES NETWORK

#### Applications

Battery, Automotive

# B28

## HIGH SPEED COMPACT LEAK TESTER

### FOR INDUSTRIAL QUALITY CONTROL

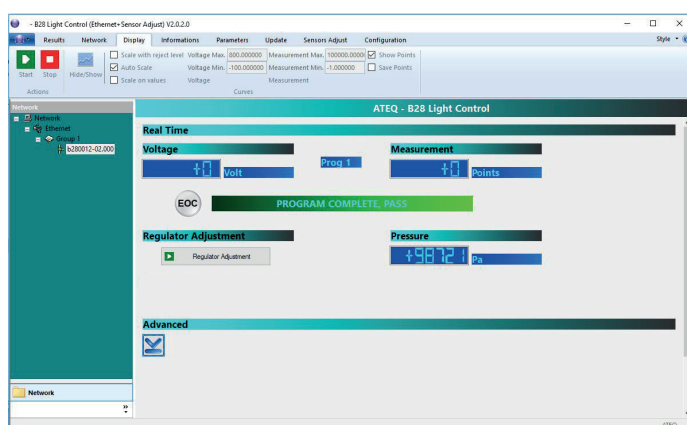

#### Measurement Characteristics

Test	Range*	Max. resolution
Test Voltage	50 - 750 VDC	< 1% FS
Leak	0 to 100 000 pts	
Pressure	0.5 kPa to ATM	

Accuracy: linearity + repeatability + hysteresis  
 \*Optional laboratory accuracy available

#### B28 control

#### Main Features

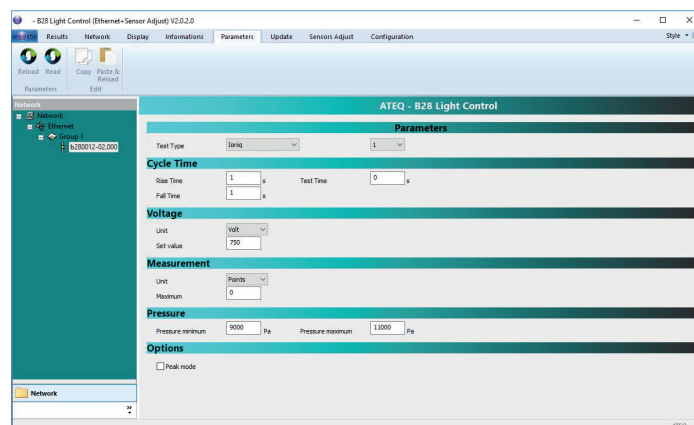

- Leak measurement using air ionization method
- (I max < 1 mA)
- Compact size
- External vacuum source
- Ethernet network up to 50 modules (Modbus IP)
- DIN rail mounting
- Environment: ROHS standard

#### Technical Specifications

Physical	Weight: approx 3.5 kg Dimensions: (overall (mm)): H 155.5 x L 97 x D 229.55)
Electrical external supply	Voltage: 24 V DC / 1.6 A Main adapter (included): 110 – 230 VAC
Temperature	Operating: +5°C to +45°C Storage: 0°C to +60°C

#### Options

- Integrated fill and dump valves

Specifications subjects to change without notice, non-contractual photos, December 2024.
